

WHAT IS CLAIMED IS:

1. A container for television cameras of closed-circuit surveillance and monitoring systems, comprising a composite box-like body with a bottom whereon connectors for connecting cables are installed, further comprising a
5 cover which conceals said connectors, preventing access thereto, is hinged to said body and can be closed onto said bottom by at least one fixing element.

2. The container according to claim 1, wherein said bottom is joined to the body by means of screws which are arranged axially, said cover being
10 shaped so as to conceal the heads of said screws so as to prevent access thereto.

3. The container according to claim 1, wherein said at least one security fixing element comprises a screw with a head which is shaped so as to be
operated by means of a standardized or special dedicated tool.

15 4. The container according to claim 1, wherein said at least one fixing element is constituted by a locking bolt.

5. The container according to claim 1, wherein said box-like body is joined to a base by means of a dovetail coupling, said base having a protrusion which lies opposite to the hinged connection of said cover to said
20 body, a threaded dead hole for the coupling of said fixing element being provided on said protrusion.
